S1-30-4 Baler System

This baler is designed for the applications where a standard 60" baler is not the best fit. Bale weight is a function of the bale height. Standard bale height is around 18".

Features:

- 30" x 24" bales
- Height 15" to 34" nominal
- 1 hp 110volt system (15amp current).
- 2000 psi hydraulic pressure.
- 4" Hydraulic Cylinder (56,500 lbs platen force)
- Interlocking door
- Push button controls
 - Up / Down / Key lock E-Stop
- Indicator lights
 - Doors Open (Amber) / Bale Made (Green)
 - System Power and error light (White)
- Automatic cycle
 - Once the doors are closed, pressing the down button will begin an automatic cycle. If the target bale size is not reached during an automatic cycle, the system will reset for loading.
